

## CONCISE EXPLANATION UNDER RULE 98

JP-A-8-258369

This document relates to an ink jet printer including a guide shaft extending in a direction perpendicular to a feeding direction in which a recording sheet is fed; a carriage which is reciprocated while being guided by the guide shaft; and an ink jet printing head which is mounted on the carriage and has nozzles for outputting inks toward the recording sheet to record characters on the sheet. The ink jet printer further includes an eccentric cam which is rotatably supported by the carriage and engages the ink jet printing head; and a biasing member which is supported by the carriage and biases the ink jet printing head toward the eccentric cam.

JP-A-8-290564

This document relates to an ink jet printing apparatus including an ink jet printing head which outputs inks toward a recording sheet to print characters on the sheet; and a feeding roller which feeds the recording sheet to a position where the sheet faces the printing head. The printing apparatus further includes a discharging roller which discharges the recording sheet from the position where the sheet faces the printing head; a pressing means for pressing the recording sheet against the discharging roller; and a roller plate which supports the discharging roller such that the roller is rotatable and which is movable relative to the printing head.

JP-A-10-29315

This document relates to a cleaning device which can advantageously clean an ink jet recording head even in the case where a clearance between the recording head and a recording sheet is adjustable.
